Summary

Hybrid engineering leader (manager/architect) delivering results in high-availability web platforms. Led 10+ engineers across time zones, ran 1:1s/coaching, roadmaps and KPIs, and partnered with SRE for incident readiness. Track record: –60% CI credits, +30% pipeline performance, +30% site performance, 95% on-time delivery. Practices Results, Iteration, Transparency; operates remote-first and documentation-first

Skills

Leadership & Management: Hiring, 1:1s, Coaching, Agile delivery, OKRs/KPIs, Remote/async

Platform & Reliability: CI/CD (GitLab/GitHub/Jenkins), Kubernetes, AWS, Observability (Dynatrace), Nginx

Web Engineering: TypeScript, React, Node.js, GraphQL, Webpack, Microfrontends

Data/Back-end exposure: Java/Spring Boot, C#/ASP.NET, SQL, Kafka

Experience

Lead Engineer, SAP Signavio

Jan 2023 – Present

- Reengineered CI/CD by decoupling client/server deployments, reducing CI credits 60% and improving pipeline performance 30%
- Migrated SAP Design System UI5 v1→v2 across three repositories with an isolation layer for shared components, reducing layout issues and build breakages
- Established observability with Dynatrace and proactive incident workflows; partnered with SRE on on-call to tighten MTTR and availability
- Partnered with PM, SRE, and Backend as stable counterparts; aligned roadmaps and dependencies
- Instituted documentation-first workflows (RFCs, decision logs) to accelerate async collaboration
- Set guardrails for CI spend and p95 pipeline times with automated alerts and thresholds

Tech Lead, Westwing

Apr 2021 – Dec 2023

- Designed and implemented microfrontend architecture with Webpack Module Federation, increasing development speed 20% and decreasing deployment time 25%
- Owned roadmaps and KPIs; delivered 95% on-time; improved site performance 30% using SpeedCurve and New Relic
- Led and mentored 10+ developers; partnered across Product/Design to ship core features and elevate UX
- Built and managed a distributed team of 10+ with structured 1:1s, growth plans, clear expectations
- Drove quarterly OKRs/KPIs with weekly checkpoints and risk reviews to sustain 95% on-time
- Published cross-repo guidelines for microfrontends/SSR boundaries to reduce regressions and coupling

Tech Lead, Autretech LLC (FinTech)

Jan 2019 – Apr 2021

- Built frontend architecture, UI/UX, and team processes from zero-to-one; managed a team of 5–6 engineers
- Developed algorithms to reveal financial market manipulation; integrated and delivered within a large bank
- Drove customer discovery, prioritized roadmap, and established release cadence and quality bars
- Practiced iteration and boring solutions; shipped MVCs; used two-way door decisions for fast course-corrects
- Established remote-first rituals and transparent planning docs to align stakeholders
- Partnered with Data/Backend and banking stakeholders to land integrations and compliance

Education

BMSTU – Specialist, Robotics and Complex Automation
