Summary

Senior Software Engineer (TypeScript/Java) building reusable UI frameworks and large-scale web platforms. Deliver end-to-end features with Product/Design, improve architecture and performance, and ship reliably: –60% CI credits, +30% pipeline performance, +30% site performance, 95% on-time

Skills

Languages: TypeScript, JavaScript, Java, SQL

Frontend: React, Webpack, Microfrontends (Module Federation), SSR

Backend/Platform: Node.js, Spring Boot, Kafka, Kubernetes, AWS, Nginx

Quality/Obs: CI/CD (GitHub/GitLab/Jenkins), Testing, Dynatrace, SLIs/SLOs

Foundations: Data structures & algorithms, system design, content platforms

Experience

Senior/Lead Engineer, SAP Signavio

Jan 2023 – Present

- Reengineered CI/CD by decoupling client/server deployments, reducing CI credits 60% and improving pipeline performance 30%
- Migrated SAP UI5 v1→v2 across three repositories with an isolation layer for shared components, reducing layout issues and build breakages
- Established observability with Dynatrace, Grafana, and Kibana and proactive incident workflows; partnered with SRE on on-call to tighten MTTR and availability
- Instituted documentation-first workflows (RFCs, decision logs) to accelerate async collaboration

Tech Lead, Westwing

Apr 2021 – Dec 2023

- Designed and implemented microfrontend architecture with Webpack Module Federation, increasing development speed 20% and decreasing deployment time 25%
- Implemented SSR boundaries and shared UI packages to build reusable, extensible frontends; improved site performance 30% using SpeedCurve, New Relic, and Grafana/Kibana
- Delivered end-to-end features with Product/Design; owned KPIs and sustained 95% on-time delivery

Tech Lead, Autretech LLC (FinTech)

Jan 2019 – Apr 2021

- Developed algorithms revealing financial market manipulation (Java/TypeScript); delivered integrations within a large bank
- Built frontend architecture and team processes from zero-to-one; managed 5–6 engineers; established release cadence and quality bars
- Partnered with Backend/Data to design event-driven services (Kafka) and API contracts
